CAA - Tactical grip

Für Preis: +352-80 71 80

Beschreibung

One of our most demanded products. Provides a solid & comfortable forearm grip, combined with drawn & pivot pods. Highly recommended for stability, moving targets & very effective in reducing the breath influence.

- Strong & solid mechanism spring & legs.
- Tremendously reliable in rough conditions, such as mad, sand & rain.
- Easily to fit/remove from Picatinny rails due to the thumbnut locker.
- Easy to operate the pods – thumb push button to release the pods & two fingers push to lock it back.
- Safe to operate the pods – takes only the front forearm, so the main hand can always be ready on trigger & safe.
- 140° pivoting – once lifting the pods, automatically set back to centre.
- The bottom surface is made of solid rubber to avoid slipping.
- Legs made of extremely strong polymer with metal inserts.
- Equally made for left/right handed users.
- Optional to add the #PGS pressure switch mount.
- No gunsmith required • Mill-standard •
